Full-stack software developer with experience building responsive web applications, secure REST APIs, and AI-enabled product features. Works across React, Next.js, Node.js, MongoDB/MySQL, and cloud tools, with a focus on performance and practical product delivery.

EXPERIENCE

Reeva Sustainability LLP | Software Developer | On-site Nov 2025 - Present

- Architected a modular full-stack system with React, Next.js, Node.js, and MongoDB/MySQL, contributing to a 20% application performance improvement.
- Built secure REST APIs with JWT authentication and role-based access control (RBAC), supporting 1,000+ user requests.
- Applied server-side rendering (SSR) and static site generation (SSG), improving page responsiveness by 25%.
- Integrated Stripe payments and Gemini AI through modular services, contributing to a 15% increase in user engagement.
- Collaborated through Agile planning, code reviews, and Git-based workflows.

Panacea Infosec | Full Stack Intern | On-site Nov 2024 - Oct 2025

- Developed responsive web applications with React.js, Next.js, Node.js, MongoDB, and MySQL.
- Optimized Next.js rendering with SSR and SSG, reducing page load time by 30% and improving SEO performance.
- Implemented API routes and JWT-based authentication to secure application functionality.
- Contributed to Agile planning, code reviews, and debugging; resolved 20+ application issues using DevTools and Postman.

SELECTED PROJECTS

EdTech System | MERN, Next.js, MUX, Stripe, Gemini AI | [Live demo](#)

- Built a teacher/student learning platform with course creation, video lessons, PDF notes, paid courses, and file uploads.
- Added structured student chapters and Gemini-generated quizzes with instant scorecards.

AI Mock Interview Platform | Next.js, Gemini AI, speech tools | [Live demo](#)

- Created role-specific practice interviews with AI-generated questions, text-to-speech prompts, speech-to-text answers, and video preview.
- Provided question-level AI feedback so candidates can review strengths and improvement areas.
